SUMMARY

Experienced programming professional familiar with working on databases and applications. Specializing in PHP, JavaScript, Java and C# development tools. Collaborative and productive with excellent planning and communication abilities. I worked on multiple projects for web development and object-oriented programming.

EDUCATION AND TRAINING

Associate of Arts, Computer and Web Programming
Lake Superior College   *Duluth, MN • 05/2025*

COMPUTER AND WEB PROGRAMMING PROJECTS

- Pylnyader – A game built using Python that resembles Space Invaders.

- 2D Game – A game made using Unity and C#. This game had the player running around grabbing coins and having monsters chase them.

- 3D Game – Another game made in Unity and C#. This game just focused on basic 3D mechanics Unity has to offer.

- ATM C# - Users can create accounts and check multiple accounts they have while depositing and withdrawing from accounts.

- IMS Java – Inventory management through multiple departments(frozen food, chilled, etc) and updates on hands of items in each category when added or sold and prints everything to a text document.
